Spotlight on the Virtual Toolkit

Over the past months, our project team has been busy developing the IL4SH Virtual Toolkit – a central hub for educators who want to bring intergenerational learning and sustainability education into their classrooms and communities.

The toolkit collects all the resources we have been working on since the start of the project:

- Ready-to-use workshops on Circular Economy, Composting at Home, Sustainable Use of Electricity, and the Environmental Impact of Laundry Detergent. Each comes with step-by-step instructions, downloadable materials, and flexible activities for teachers to adapt to their time frame.
- Additional learning topics on areas such as Citizen Science in Schools, Managing Diverse Groups and Sharing Across Generations, and Design Thinking. These interactive resources give teachers a deeper foundation for leading sustainability projects.
- Tools and resources – from simple creativity methods like Brainwriting to digital platforms such as Miro and Mentimeter – designed to support educators in planning, running, and evaluating activities.

Coming Soon:

The IL4SH Virtual Toolkit

Our brand-new Virtual Toolkit is almost here!

It brings together workshops, tools, and learning materials to help teachers introduce sustainability and intergenerational learning in their classrooms.

Stay tuned for the official launch — and get ready to explore resources in all partner languages!

The toolkit was created collaboratively by all project partners, tested in practice, and refined through feedback from teachers and educators across Europe. We are now finalising it, and soon it will be available in all partner languages.

Why It Matters

The IL4SH Virtual Toolkit is more than just a collection of resources – it is a way to make intergenerational learning concrete, practical, and inspiring. By connecting young people, families, and educators through Citizen Science and sustainability practices, we are helping to build greener, more collaborative households across Europe.

Stay tuned for the official launch of the Toolkit – and thank you for following our journey!

What's next?

This autumn marks an exciting phase for IL4SH:

- The official launch of our IL4SH Toolkit
- Schools are now starting to implement the workshops with their students and the experiential labs.
- Several Science Cafés are planned, offering opportunities for students, teachers, families, and communities to exchange knowledge and experiences.
- In November, the consortium will meet for the final partner meeting in Göttingen, Germany, where we will also join the German partner school's Science Café and see firsthand the projects developed over the past months.
